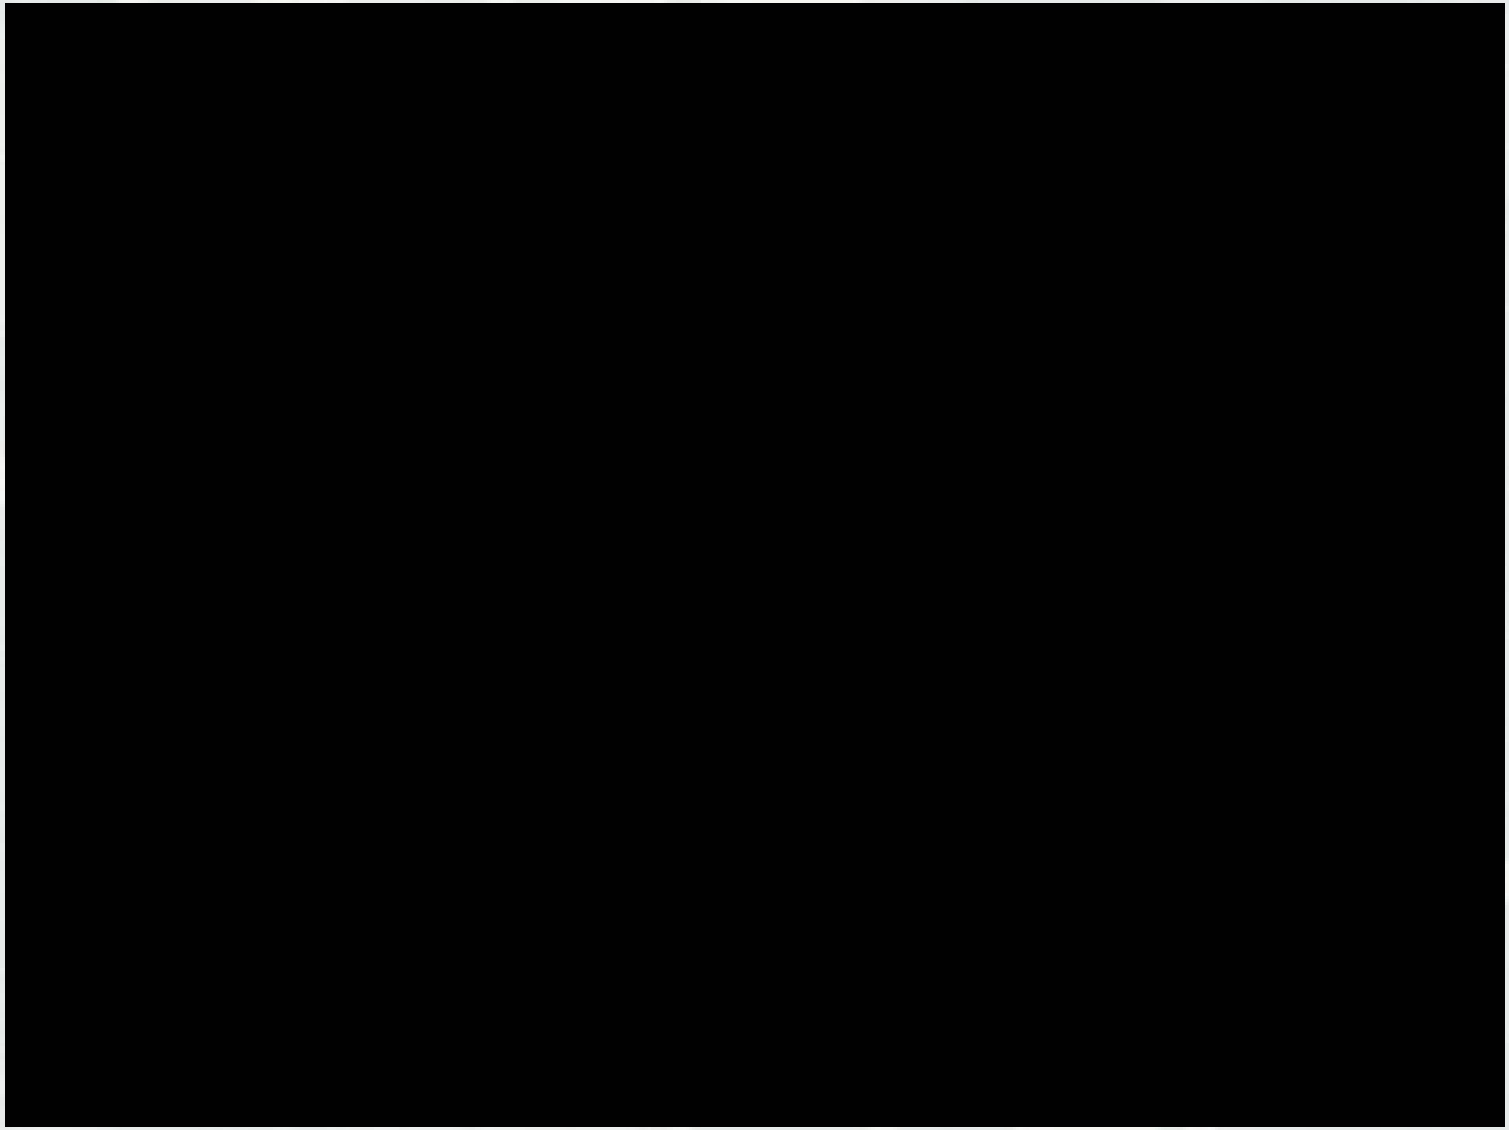
US Army Corps of Engineers
BUILDING STRONG®



Mission

Afghanistan Engineer District-North supports the BUILDING of Afghanistan by delivering timely and reasonable quality infrastructure, providing O&M services, and BUILDING the Engineering and Construction capacity of Afghanistan in order to support the coalition COIN strategy. On order, transitions the mission to the Afghanistan Government.

Broader purpose

To establish enduring district programs and tools to deliver quality infrastructure as a key Coalition Force enabler. Leverage USACE competencies and resources to affect capacity development and improve the lives of the Afghan people.

Overview

The district's program is comprised of five programs, including the Afghanistan National Army, the Afghanistan National Police, Military Construction, Operations & Maintenance and Infrastructure & Planning. In addition, the district's Capacity Development Program helps to bolster the capacity of the Afghan people to design, engineer, build and maintain facilities as U.S. and Coalition partners transition out of the theater of operations.
